

**China/Asia on Demand Metadata Accessible
via *EBSCO Discovery Service*[™]**

*~ Agreement with Oriprobe Information Services Inc. Brings Valuable Research
Literature from Asia to EBSCO Discovery Service[™] Users ~*

IPSWICH, Mass.& WINDSOR, Ontario — February 14, 2012 — A new partnership between [EBSCO Publishing](#) (EBSCO) and [Oriprobe Information Services Inc.](#) will allow content from China/Asia On Demand (CAOD) to be accessible within [EBSCO Discovery Service[™]](#) (EDS). The agreement allows for metadata from this valuable collection of research literature from Asia to be added to the Base Index of EDS. The EDS Base Index represents content from approximately 20,000 providers (and growing) in addition to metadata from another 70,000 book publishers, representing far more content providers and publishers than any other discovery service.

China/Asia On Demand features a vast collection of reliable, authoritative information spanning arts and humanities, STM (Science, Technology, Medicine) research, social and business information. The collection includes over 10,000 journals and more than 40 million research articles. The addition of this content to the EDS Base Index will benefit EDS users looking for unique research literature from China, Japan and Korea.

China/Asia On Demand is part of a growing list of publishers and other content partners that are taking part in EDS to bring more visibility to their content. Partners include the world's largest scholarly journal & book publishers including Elsevier, Wiley Blackwell, Springer Science & Business Media, Taylor & Francis Informa, Sage Publications, and thousands of others. Partners also include content providers, such as LexisNexis, Thomson Reuters (Web of Science), JSTOR, ARTstor, Credo Reference, World Book, ABC-CLIO, and many others.

EBSCO Discovery Service creates a unified, customized index of an institution's information resources, and an easy, yet powerful means of accessing all of that content from a single search box—searching made even more powerful because of the quality of metadata and depth and breadth of coverage.

EBSCO Discovery Service is quickly becoming the discovery selection for many libraries (www.ebscohost.com/discovery/eds-news), and an obvious partner for content providers. Because the service builds on the foundation provided by the *EBSCOhost*[®] platform, libraries gain a full user experience for discovering their collections/OPAC—which is not typical in the discovery space. Further still, in the many universities and other libraries where *EBSCOhost* is the most-used platform for premium research, users are not asked to change their pathways or habits for searching. There's simply more to discover on the familiar *EBSCOhost* platform, and the same can be said for library administrators who can leverage their previous work with *EBSCOadmin*[™].

About Oriprobe Information Services

Oriprobe Information Services, Inc., headquartered in Ontario, Canada, is a leading supplier of information solutions and China/Asia electronic resources. Oriprobe offers copyright permission acquiring and granting, content licensing, translation, and information retrieval services from China as well as other parts of Asia. Oriprobes electronic collections include journals, dissertations/theses, conference proceedings, patents, standards, newspapers, companies and products, institutions, policies and laws. About EBSCO Publishing

EBSCO Publishing is the producer of *EBSCOhost*[®], the world's premier for-fee online research service, including full-text databases, subject indexes, point-of-care medical reference, historical digital archives, and eBooks. The company provides more than 350 databases and nearly 300,000 eBooks. Through a library of tens of thousands of full-text journals and magazines from renowned publishers, EBSCO serves the content needs of all researchers (Academic, Medical, K-12, Public Library, Corporate, Government, etc.). EBSCO is also the provider of *EBSCO Discovery Service*[™] (*EDS*), which provides each institution with a fast, single search box for its entire collection, offering deeper indexing and more full-text searching of journals and magazines than any other discovery service (www.ebscohost.com/discovery). For more information, visit the EBSCO Publishing Web site at: www.ebscohost.com, or contact: information@ebscohost.com.

EBSCO Publishing is a division of EBSCO Industries Inc., one of the largest privately held companies in the United States.
