

EBSCO Publishing and NoveList Introduce *NoveList® Select*
~ *NoveList Select™* — *Delivering High Quality Content from the*
NoveList Suite of Products Directly to Library Catalogs ~

IPSWICH, Mass. — May 26, 2009 — [EBSCO Publishing](#) and the creators of the readers' advisory service, [NoveList®](#) have released [NoveList® Select](#), which extends a library catalog by providing links to other books by leveraging *NoveList* content. *NoveList & NoveList® Plus* are the most frequently used readers' advisory resources, effectively connecting readers to their next book. *NoveList Select* helps avoid the dead end searches that occur when all copies of a book are checked out and provides readers with additional options for what to read next.

With *NoveList Select*, each recommendation is a live link to the library catalog allowing users to discover new books that meet their needs and that are sitting on their library's shelves. The rationale for each recommendation is intuitively displayed providing information that allows users to understand why a particular title is being suggested.

This new catalog enrichment resource enables *NoveList & NoveList Plus* users to view a list of similar and recommended books from more than four million titles—right within the catalog. *NoveList Select* also adds links to Recommended Reading Lists, Author Read-alikes, Book Discussion Guides and additional feature content into the catalog results.

Duncan Smith, NoveList product manager, says *NoveList Select* adds additional information to all major library automation systems. "Library patrons turn to the catalog as a place to start and *NoveList Select* takes them beyond that one book they were looking for, back into the virtual stacks where they are able to discover the full depth and breadth of a library's collection."

[NextReads®](#) customers will also benefit from this new service since *NoveList Select* provides links from bibliographic records to the library's newsletters and newsletter signup page. *NoveList Select* is available for all major integrated library systems.

About EBSCO Publishing

EBSCO Publishing is the world's premier database aggregator, offering a suite of nearly 300 full-text and secondary research databases. Through a library of tens of thousands of full-text journals, magazines, books, monographs, reports and various other publication types from renowned publishers, EBSCO serves the content needs of all researchers (Academic, Medical, K-12, Public Library, Corporate, Government, etc.). The company's product lines include proprietary databases such as *Academic Search*[™], *Business Source*[®], *CINAHL*[®], *DynaMed*[™], *Literary Reference Center*[™], *MasterFILE*[™], *NoveList*[®], *SocINDEX*[™] and *SPORTDiscus*[™] as well as dozens of leading licensed databases such as *ATLA Religion Database*[™], *EconLit*, *INSPEC*[®], *MEDLINE*[®], *MLA International Bibliography*, *The Philosopher's Index*[™], *PsycARTICLES*[®] and *PsycINFO*[®]. Databases are powered by *EBSCOhost*[®], the most-used for-fee electronic resource in libraries around the world.
