Give Interdisciplinary Care Teams the tools to provide the best patient care.

Interdisciplinary care teams play a vital role in improving patient care and quality outcomes by treating the whole patient — physically, nutritionally, emotionally and psychologically. To do so, team members must be on the same page regarding the information and resources they use. EBSCO Health’s suite of evidence-based point-of-care resources give them the support they need.

Created by a world-class team of doctors, nurses, rehab professionals, dietitians and social workers, EBSCO Health point-of-care resources:

- Ensure continuity of care by providing trusted information and patient education materials that work cohesively across specialties
- Present vital information in easily digestible formats that map to the workflows of each team member
- Promote evidence-based practice
- Provide accredited continuing education modules to aid in maintaining licensure and certifications
- Offer user-friendly interfaces that seamlessly integrate with your EMR, LMS and Intranet
