

# Services to support your e-package access and management needs — from acquisition to renewal

Maximize the value of your package content, work more efficiently, and better meet the research needs of your users. EBSCO's package management services work for you by...

## **Linking your users to content in e-packages**

*EBSCO SmartLinks+*™ technology lets users link seamlessly from citations in *EBSCOhost*® databases to full-text content in your e-packages.

## **Maintaining correct title lists**

Title lists are reconciled and package changes are updated in real time to help you stay in control of licensed titles. EBSCO works with consortia and publishers to ensure a correct list of titles for access.

## **Providing online management solutions**

E-package changes, title list details, customizable reports, timely alerts, and more are available through *EBSCONET*™ *Subscription Management*.

## **Customizing invoices**

Invoices can be tailored to your institution's needs: title-by-title, lump-sum, or anything in between.

## **Management for all types of collections**

Support is offered for a wide range of models — from traditional maintained-spend collections to single-price database-type collections.

## **Streamlining renewals**

Many collections can be viewed, worked, and renewed from a single online location via *EBSCONET*® *E-Package Renewals*.

# Reduce the time you spend on renewals from several weeks to just a few hours with EBSCONET® E-Package Renewals

In partnership with select publishers — Springer, Wiley, Taylor & Francis, and other industry leaders — EBSCO offers a single Web-based interface that simplifies the e-package renewal process for librarians, institutions, and consortia.

The Contract Summary page provides information on previous- and current-year spends and key license parameters that will be important when working your renewal.

The Subscribed Titles page identifies the title list on which your pricing is based; you can make changes to that list from this page if allowed by your contract with the publisher. Subsequent pages are customized based on your license model with the publisher (shown below).

Displayed pricing is customized based on your agreement with the publisher.

Easily select the format you wish to purchase.

The Available or Included Titles page will display titles that can be added to your package or titles that are included with your package subscription.
