

POISON^{expert} PRODUCT DATA SHEET

PoisonEXPERT™ provides integrated access to content from TOXINZ, the essential database that offers current, concise and reliable recommendations on the management of chronic and acute exposures to hazardous substances. It is indispensable to those:

- Managing occupational health issues in chemical-intensive industries
- Working directly with chemicals in the workplace or the environment
- Responding to fires, spills, or explosions involving chemicals
- Authorizing and verifying MSDS and product labels
- Establishing, maintaining, managing, and monitoring safe, healthy and compliant workplaces
- Evaluating product safety
- Creating regulatory submission documents

Powered by ExPub's easy to use interface, the resource allows users to quickly find and retrieve the mission-critical information that they need to complete their jobs. All content in *PoisonEXPERT™* is fully referenced with direct links to PubMed, continuously reviewed and expanded to include new content, and updated in real-time.

Your ExPub experience also includes these subscriber bonuses:

- *ListEXPERT™*
- *TOXLINE®* Special
- TSCATS
- Environmental Chemistry Information System (ECIS)
- *MyEXPERT™*

You can count on *PoisonEXPERT* for evidence-based medical protocols for the treatment of exposures to hazardous substances:

- Medical treatment protocols for over 4,600 unique chemicals
- Signs and symptoms of exposures
- Advances and basic life support
- Chronic and acute exposure assessment
- Human and reproductive toxicology
- Intervention criteria including observation period and admission criteria
