| Amniocentesis Test for Chromosome Problems: Yes or No? | • Having amniocentesis  
• Not having amniocentesis                                           | • What is it?  
• Will we know for sure if our baby has Down syndrome or another chromosome problem?  
• Are there risks to the baby?  
• If a problem is found, what does that mean for us?  
• What are women told after the test?  
• Are there other tests? | 0 | US and UK | WA State Certified - July 2018 |
| Atrial Fibrillation: Treatment Options to Lower Stroke Risk | • No treatment  
• Warfarin  
• Dabigatran  
• Rivaroxaban  
• Apixaban  
• Edoxaban  
• Aspirin  
• Left atrial appendage closure | • What does the treatment involve?  
• My risk of stroke due to blood clots?  
• My risk of major bleeding needing treatment?  
• Other risks and side effects?  
• Can blood thinning effect of the drug be reversed?  
• What is the cost? (for US version only) | 2 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Percutaneous Left Atrial Appendage Closure (LAA) Closure Therapy by Centers for Medicare and Medicaid Services (CMS). |
| Down Syndrome Screening Test: Yes or No? | • Having screening for Down syndrome  
• Not screening for Down syndrome                                      | • What is it?  
• What will the screening tests tell us?  
• How likely are we to get a lower- or higher-chance result?  
• Will we know for sure if our baby has Down syndrome?  
• What if the diagnostic test shows a problem?  
• Are there risks to the pregnancy? | 0 | US and UK | WA State Certified - February 2019 |
| Enlarged Prostate: Treatment Options for Benign Prostatic Hypertrophy | • Watchful waiting  
• Lifestyle changes  
• Alpha blockers  
• S-Alpha reductase inhibitors (5-ARIs)  
• Transurethral resection of the prostate (TURP)  
• Laser surgery  
• Transurethral microwave therapy (TUMT; for US version only) | • What does the treatment involve?  
• Will it help my symptoms?  
• Will I feel less often at night?  
• What are the risks of an enlarged prostate?  
• What are the side effects?  
• What are the risks of treatment? | 1 | US and UK | |
| Failure to Progress in Labor: Delivery Options | • Vaginal delivery  
• Cesarean section (C-section) | • What does the delivery involve?  
• What are the risks to my baby?  
• What are the risks to me?  
• What is the chance that I will still have a C-section?  
• Will I be able to care for my baby?  
• What will my recovery be like? | 0 | US and UK | |
| Heavy Menstrual Bleeding: Treatment Options | • Treatment with hormones  
• Medicine without hormones  
• Dilation and curettage (D&C)  
• Endometrial ablation  
• Hysterectomy | • What does the treatment involve?  
• Will I bleed less?  
• Can I still get pregnant?  
• What are the side effects?  
• What are the risks? | 0 | US and UK | |
| Hepatitis C Treatment Now: Yes or No? | • Delay treatment  
• Treatment with direct-acting antiviral medicines | • What does it involve?  
• Will the infection go away?  
• What are the side effects of treatment?  
• What are the risks? | 0 | US and UK | This decision aid meets requirements outlined in the Centers for Medicare and Medicaid Services (CMS) Quality Payment Program measure for “Hepatitis C: Discussion and Shared Decision-Making Surrounding Treatment Options”. |
| Herniated Disk in Lower Back: Treatment Options | • Treatment without surgery  
• Shots in your back (epidural injections)  
• Surgery (open surgery)  
• Minimally invasive surgery | • What does the treatment involve?  
• Will it help my pain?  
• Might I get surgery later?  
• What are the side effects?  
• What are the risks?  
• When will I recover? | 0 | US and UK | |
| Hip Osteoarthritis: Treatment Options | • Exercise  
• Physical therapy  
• Acetaminophen  
• Oral nonsteroidal anti-inflammatory drugs (NSAIDs)  
• Oral opioid medicines  
• Shots in your hip  
• Hip replacement | • What does the treatment involve?  
• Will it help my pain or activity?  
• How long will it work?  
• What are the side effects?  
• What are the risks?  
• How long until I recover from treatment? | 0 | US and UK | |

| Implantable Cardioverter Defibrillator for Heart Failure: Yes or No? |  • Yes to ICD  
  • No to ICD                                                                 |  • What does the treatment involve?  
  • Will it help me live longer?  
  • Will it change my usual activities?  
  • Will the ICD shock my heart?  
  • What are the risks of having an ICD put in place?  
  • What are the long term risks?  
  • Can the ICD be turned off or removed?                                                                 | 2 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Implantable Cardioverter Defibrillators by Centers for Medicare and Medicaid Services (CMS). |
| Ischemic Heart Disease: Treatment Options for Chest Pain from One Blocked Artery |  • Taking medicines  
  • Unblocking the artery (using a stent)                                                                 |  • What does the treatment involve?  
  • Will it help my symptoms?  
  • Will it lower my risk of a heart attack or dying?  
  • What are the side effects and risks?  
  • Will I need to unblock or bypass the artery later?                                                                 | 0 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Implantable Cardioverter Defibrillators by Centers for Medicare and Medicaid Services (CMS). |
| Knee Osteoarthritis: Treatment Options       |  • Exercise  
  • Weight loss  
  • Acetaminophen  
  • Oral nonsteroidal antiinflammatory drugs (NSAIDs)  
  • Topical nonsteroidal antiinflammatory drugs (NSAIDs)  
  • Opioids  
  • Arthroscopy  
  • Osteotomy  
  • Partial knee replacement  
  • Total knee replacement                                                                 |  • What does the treatment involve?  
  • Will it help my pain or activity?  
  • How long will it work?  
  • What are the side effects?  
  • What are the risks?  
  • When will I recover from treatment?                                                                 | 1 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Implantable Cardioverter Defibrillators by Centers for Medicare and Medicaid Services (CMS). |
| Lung Cancer Screening: Yes or No?            |  • Screening  
  • No screening                                                                 |  • What does the test involve?  
  • What is my chance of having lung cancer diagnosed?  
  • What are the benefits?  
  • What are the risks?                                                                 | 0 | US      | This decision aid meets requirements outlined in the Decision Memo for Screening for Lung Cancer with Low Dose Computed Tomography (LDCT) by Centers for Medicare and Medicaid Services (CMS). |
| Previous C-Section: Delivery Options         |  • Trial of labor after cesarean section (TOLAC)  
  • Planned cesarean section (C-section)                                                                 |  • What does the delivery involve?  
  • What are the risks to my baby?  
  • What are the risks to me?  
  • What is the chance that I will still have a C-section?  
  • Will I be able to care for my baby?  
  • What will my recovery be like?                                                                 | 0 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Screening for Lung Cancer with Low Dose Computed Tomography (LDCT) by Centers for Medicare and Medicaid Services (CMS). |
| Prostate Cancer: Treatment Options for Low-risk Prostate Cancer |  • Watchful waiting  
  • Active surveillance  
  • External beam radiation therapy  
  • Brachytherapy  
  • Open prostatectomy  
  • Robotic prostatectomy                                                                 |  • What does the treatment involve?  
  • What is my chance of dying from prostate cancer?  
  • Will my cancer spread?  
  • When will I recover?  
  • What are the risks and side effects?                                                                 | 0 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Screening for Lung Cancer with Low Dose Computed Tomography (LDCT) by Centers for Medicare and Medicaid Services (CMS). |
| Prostate Specific Antigen (PSA) test: Yes or No?  |  • Having a PSA test  
  • Not having a PSA test                                                                 |  • What does the test involve?  
  • Does a high PSA level mean I have cancer?  
  • Does a normal PSA test mean I do not have cancer?  
  • How many men will die of prostate cancer?  
  • What are the benefits?  
  • What are the risks?  
  • What are the risks associated with prostate cancer?                                                                 | 0 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Screening for Lung Cancer with Low Dose Computed Tomography (LDCT) by Centers for Medicare and Medicaid Services (CMS). |
| Stenosis of Lower Back: Treatment Options for Spinal Narrowing |  • Treatment without surgery  
  • Shots in your back (epidural injections)  
  • Surgery                                                                 |  • What does the treatment involve?  
  • Will it help my pain?  
  • What are the side effects?  
  • What are the risks?  
  • How long until I recover?                                                                 | 0 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Screening for Lung Cancer with Low Dose Computed Tomography (LDCT) by Centers for Medicare and Medicaid Services (CMS). |
| Uterine Fibroids: Treatment Options           |  • Treatment with hormones  
  • Medicine without hormones  
  • Fibroid destruction  
  • Endometrial ablation  
  • Myomectomy  
  • Hysterectomy                                                                 |  • What does the treatment involve?  
  • Will I have less bleeding and pain?  
  • Will the fibroids shrink or go away?  
  • Can I still get pregnant?  
  • What are the side effects?  
  • What are the risks?                                                                 | 0 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Screening for Lung Cancer with Low Dose Computed Tomography (LDCT) by Centers for Medicare and Medicaid Services (CMS). |
