| Amniocentesis Test for Chromosome Problems: Yes or No? | • Having amniocentesis  
Not having amniocentesis | • What is it?  
• Will we know for sure if our baby has Down syndrome or another chromosome problem?  
• Are there risks to the baby?  
• If a problem is found, what does that mean for us?  
• What are women told after the test?  
• Are there other tests?  | 0 | US and UK | WA State Certified - July 2018 |
| Atrial Fibrillation: Treatment Options to Lower Stroke Risk | • No treatment  
 Warfarin  
 Dabigatran  
 Rivaroxaban  
 Apixaban  
 Edoxaban  
 Aspirin  
 Left atrial appendage closure | • What does the treatment involve?  
 • My risk of stroke due to blood clots?  
 • My risk of major bleeding needing treatment?  
 • Other risks and side effects?  
 • Can blood thinning effect of the drug be reversed?  
 • What is the cost? (for US version only)  | 2 | US and UK | This decision aid meets requirements outlined in the Decision Memo for Percutaneous Left Atrial Appendage Occlusion (LAA) Closure Therapy by Centers for Medicare and Medicaid Services (CMS). |
| Down Syndrome Screening Test: Yes or No? | • Having screening for Down syndrome  
 Not screening for Down syndrome | • What is it?  
 • Will the screening tests tell us?  
 • How likely are we to get a lower- or higher-chance result?  
 • Will we know for sure if our baby has Down syndrome?  
 • What if the diagnostic test shows a problem?  
 • Are there risks to the pregnancy?  | 0 | US and UK | |
| Enlarged Prostate: Treatment Options for Benign Prostatic Hypertrophy | • Watchful waiting  
 Lifestyle changes  
 Alpha blockers  
 S-Alpha reductase inhibitors (5-ARIs)  
 Transurethral resection of the prostate (TURP)  
 Laser surgery  
 Transurethral microwave therapy (TUMT) (for US version only) | • What does the treatment involve?  
 • What is the chance that I will still have a C-section?  
 • Will I be able to care for my baby?  
 • What will my recovery be like?  | 1 | US and UK | |
| Failure to Progress in Labor: Delivery Options | • Vaginal delivery  
 Cesarean section (C-section) | • What does the delivery involve?  
 • What are the risks to my baby?  
 • What are the risks to me?  
 • What is the chance that I will still have a C-section?  
 • Will I be able to care for my baby?  
 • What will my recovery be like?  | 0 | US and UK | |
| Heavy Menstrual Bleeding: Treatment Options | • Treatment with hormones  
 Medicine without hormones  
 Dilation and curettage (D&C)  
 Endometrial ablation  
 Hysterectomy | • What does the treatment involve?  
 • Will I bleed less?  
 • Can I still get pregnant?  
 • What are the side effects?  
 • What are the risks?  | 0 | US and UK | |
| Hepatitis C Treatment Now: Yes or No? | • Delay treatment  
 Treatment with direct-acting antiviral medicines | • What does it involve?  
 • Will the infection go away?  
 • What are the side effects of treatment?  
 • What are the risks?  | 0 | US and UK | This decision aid meets requirements outlined in the Centers for Medicare and Medicaid Services (CMS) Quality Payment Program measure for “Hepatitis C: Discussion and Shared Decision Making Surrounding Treatment Options”. |
| Herniated Disk in Lower Back: Treatment Options | • Treatment without surgery  
 Shots in your back (epidural injections)  
 Surgery (open surgery)  
 Minimally invasive surgery | • What does the treatment involve?  
 • Will it help my pain?  
 • Might I get surgery later?  
 • What are the side effects?  
 • What are the risks?  
 • When will I recover?  | 0 | US and UK | |
| Hip Osteoarthritis: Treatment Options | • Exercise  
 Physical therapy  
 Acetaminophen  
 Oral nonsteroidal anti-inflammatory drugs (NSAIDs)  
 Oral opioid medicines  
 Shots in your hip  
 Hip replacement | • What does the treatment involve?  
 • Will it help my pain or activity?  
 • How long will it work?  
 • What are the side effects?  
 • What are the risks?  
 • How long until I recover from treatment?  | 0 | US and UK | |
