EBSCO Discovery Service™ to Add Metadata from JSTOR
~Academic Journals and Other Scholarly Content on JSTOR Will be Searchable for EDS Customers~

IPSWICH, Mass. — January 5, 2011 — EBSCO Publishing and JSTOR have come to an agreement to load metadata from the more than 1000 academic journals on JSTOR to EBSCO Discovery Service™ (EDS). The addition of JSTOR metadata to the EDS Base Index extends the search experience and further enhances the quality of metadata available to EDS customers.

Content on JSTOR, a not-for-profit platform used worldwide for research and teaching, spans over 1000 academic journals across the humanities, social sciences and sciences as well as select monographs and other materials valuable for academic work. Additional collections include primary source content complementary to the academic journals and monographs.

JSTOR joins a long list of platforms, publishers, and other content partners who are taking part in EDS to bring more visibility to scholarly content, such as: the British Library, Baker & Taylor, NewsBank, Readex, LexisNexis, Alexander Street Press, Oxford University Press, American Psychological Association, ABC-CLIO, ingentaconnect, Government Printing Office and for mutual customers Web of Science & H.W. Wilson—a growing list of information sources available to EBSCO Discovery Service users.

EBSCO Discovery Service is quickly becoming the discovery selection for many libraries (www.ebscohost.com/discovery/eds-news), and an obvious partner for content providers. Because the service builds on the foundation provided by the EBSCOhost platform, libraries gain a full user experience for discovering their collections/OPAC—which is not typical in the discovery space. Further still, in the many universities and other libraries where EBSCOhost is the most-used platform for premium research, users are not asked to change their pathways or habits for searching. There’s simply more to discover on the familiar EBSCOhost platform, and the same can be said for library administrators who can leverage their previous work with EBSCOadmin.
“EBSCO Discovery Service” creates a unified, customized index of an institution’s information resources, and an easy, yet powerful means of accessing all of that content from a single search box—searching made even more powerful because of the quality of metadata and depth and breadth of coverage.

The EDS Base Index forms the foundation upon which each EDS subscribing library builds out its custom collection. Beginning with the Base Index, each institution extends the reach of EDS by adding appropriate resources including its catalog, institutional repositories, EBSCOhost and other databases, and additional content sources to which it subscribes. It is this combination that allows a single, comprehensive, custom solution for discovering the value of any library’s collection.

The EDS Base Index is comprised of metadata from the world’s foremost information providers. At present, the EDS Base Index represents content from approximately 20,000 providers in addition to metadata from another 70,000 book publishers. Although constantly growing, today the EDS Base Index provides metadata for nearly 50,000 magazines & journals, approximately 825,000 CDs & DVDs, nearly six million books, more than 100 million newspaper articles, more than 20,000 conference proceedings and hundreds of thousands of additional information sources from various source-types.

About EBSCO Publishing

EBSCO Publishing is the world’s premier database aggregator, offering a suite of nearly 300 full-text and secondary research databases. Through a library of tens of thousands of full-text journals, magazines, books, monographs, reports and various other publication types from renowned publishers, EBSCO serves the content needs of all researchers (Academic, Medical, K-12, Public Library, Corporate, Government, etc.). The company’s product lines include proprietary databases such as Academic Search™, Business Source®, CINAHL®, DynaMed™, Literary Reference Center™, MasterFILE™, NoveList®, SocINDEX™ and SPORTDiscus™ as well as dozens of leading licensed databases such as ATLA Religion Database™, EconLit, INSPEC®, MEDLINE®, MLA International Bibliography, The Philosopher’s Index™, PsycARTICLES® and PsycINFO®. Databases are powered by EBSCOhost®, the most-used for-fee electronic resource in libraries around the world.
 EBSCO is the provider of **EBSCO Discovery Service™** a core collection of locally-indexed metadata creating a unified index of an institution’s resources within a single, customizable search point providing everything the researcher needs in one place—fast, simple access to the library’s full text content, deeper indexing and more full-text searching of more journals and magazines than any other discovery service ([www.ebscohost.com/discovery](http://www.ebscohost.com/discovery)). For more information, visit the EBSCO Publishing Web site at: [www.ebscohost.com](http://www.ebscohost.com), or contact: [information@ebscohost.com](mailto:information@ebscohost.com). EBSCO Publishing is a division of EBSCO Industries Inc., one of the largest privately held companies in the United States.
